

# Status of scenario simulations

**Preparation of Documentation for River Training and Dredging Works on Selected Locations along the Danube River. A project funded by the European Union**

14 December, 2012

# Serbian Sectors (km 1,300-1,273)

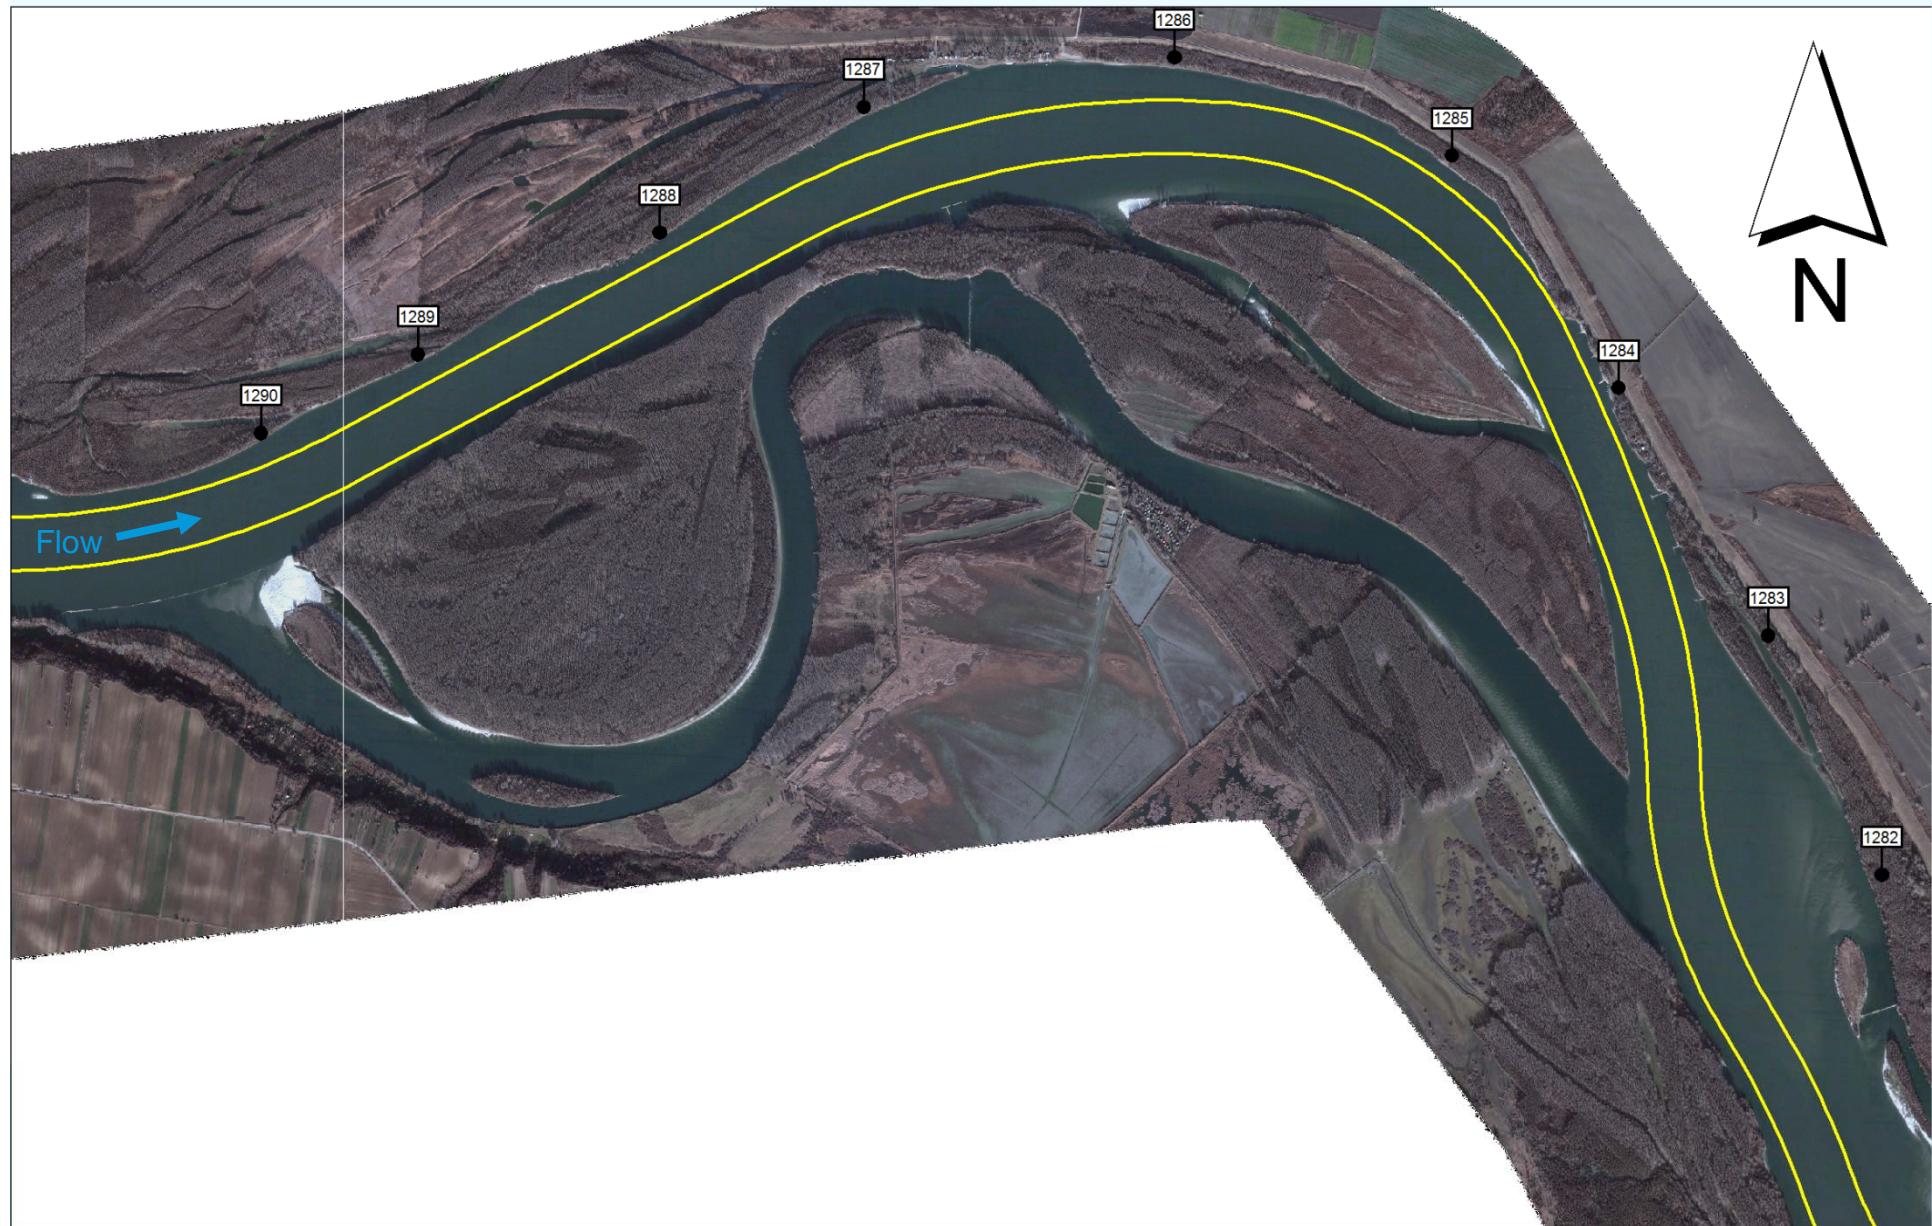

- 18. Susek
- 19. Futog
- 21. Arankina Ada
- 22. Cortanovci
- 23. Beska
- 24. Preliv

# 18. Sector – Susek (km 1,287-1,281)

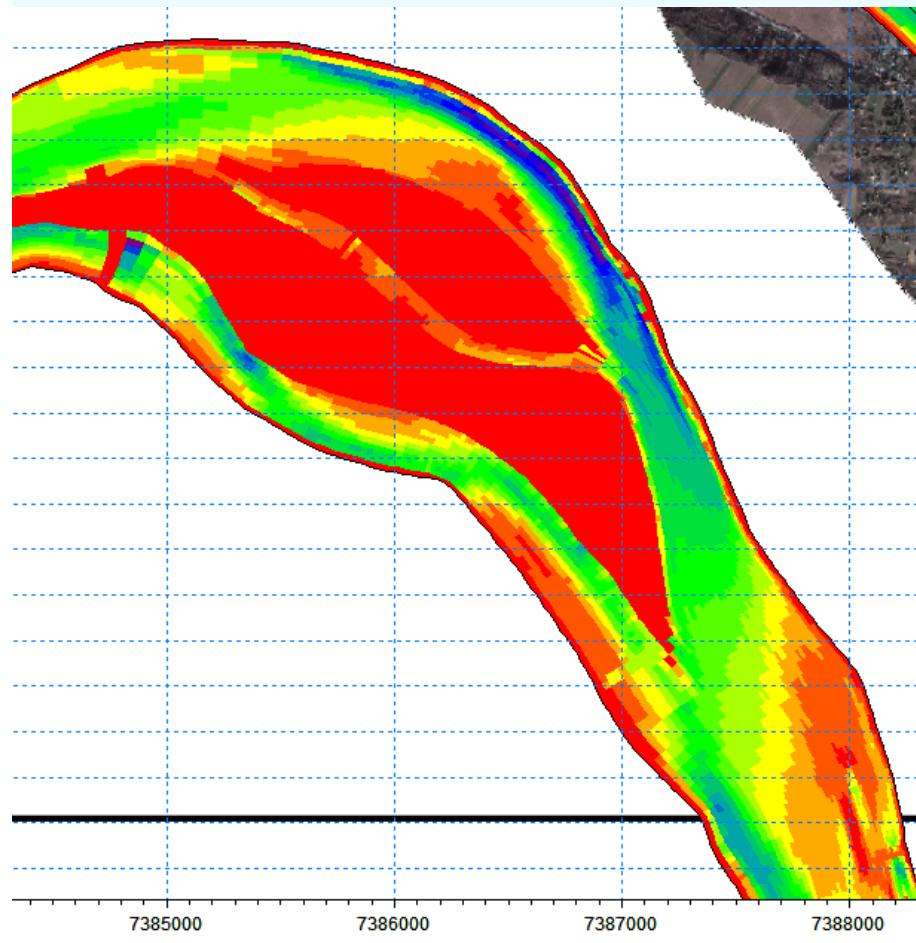

# 18. Susek – existing situation

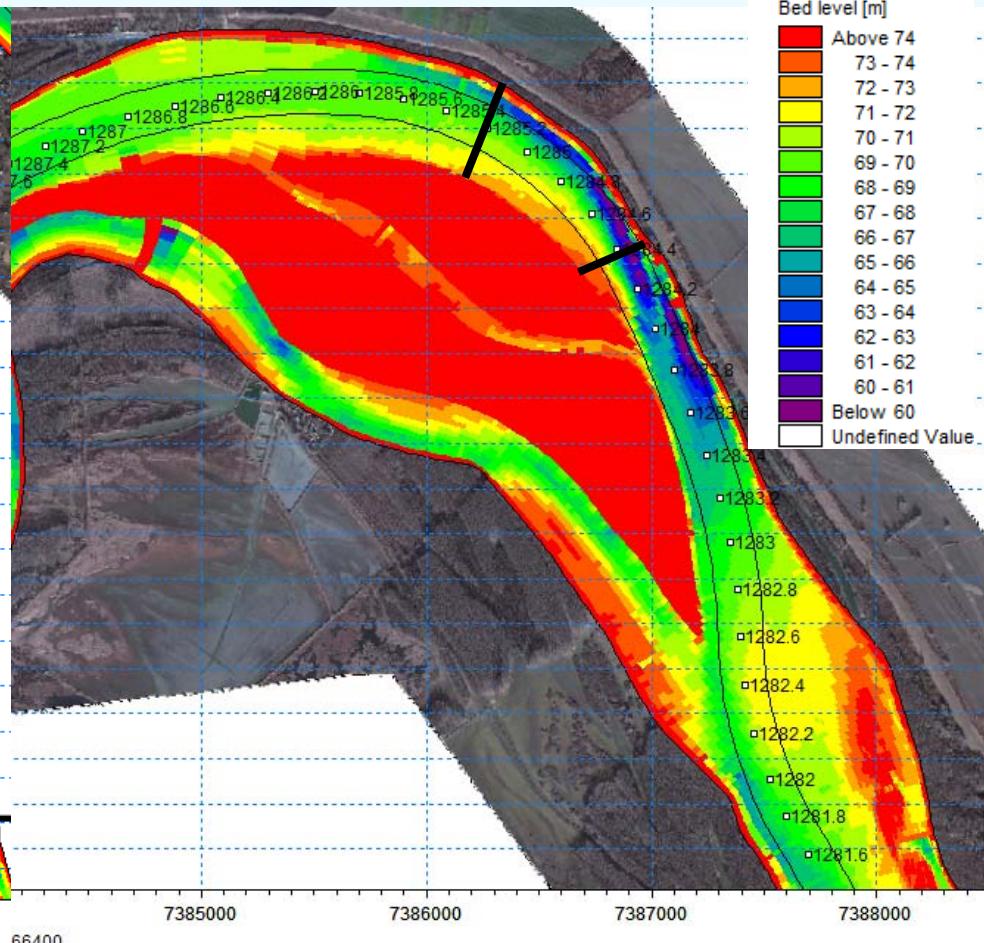

# 18. Susek – existing situation

Observed bed level changes:

2011

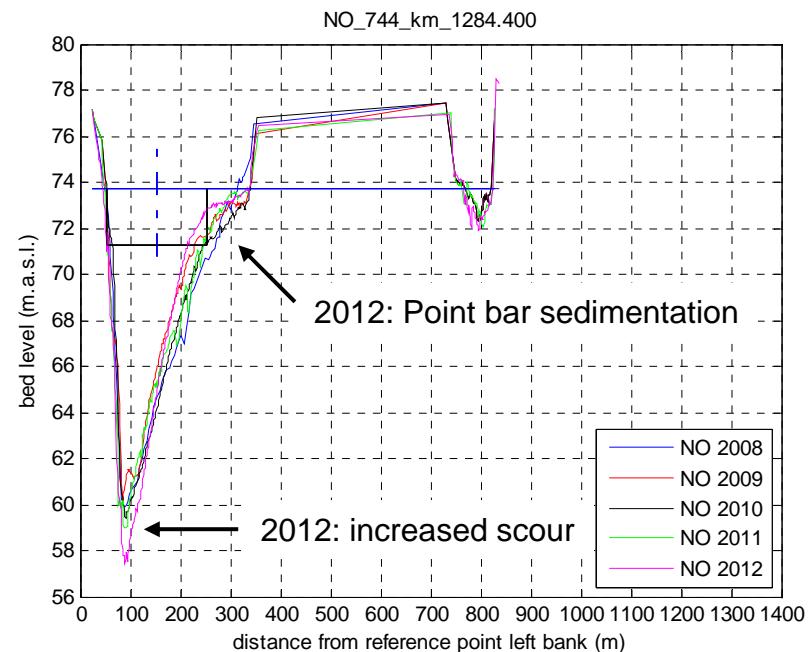

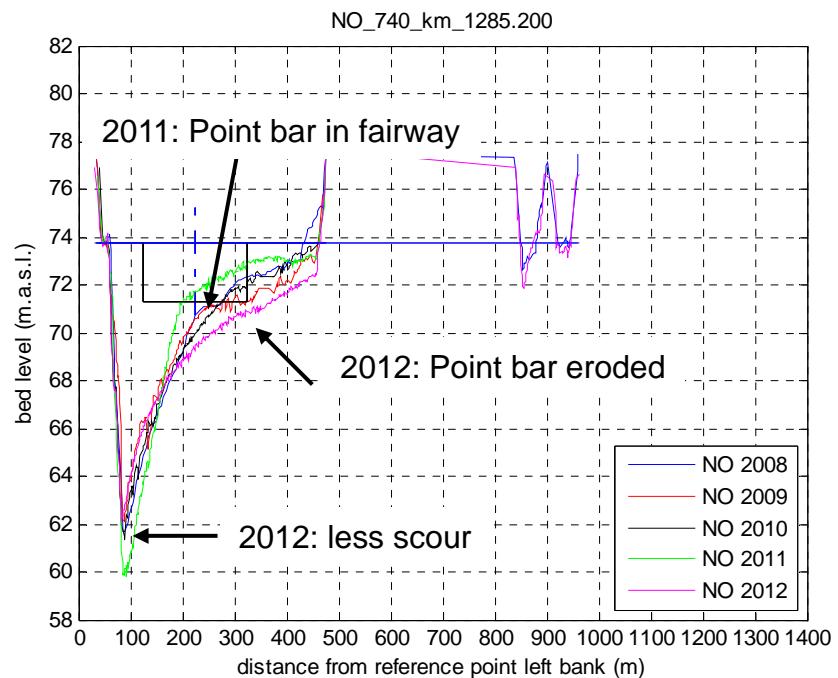

2012

Bed level [m]
Above 74
73 - 74
72 - 73
71 - 72
70 - 71
69 - 70
68 - 69
67 - 68
66 - 67
65 - 66
64 - 65
63 - 64
62 - 63
61 - 62
60 - 61
Below 60
Undefined Value

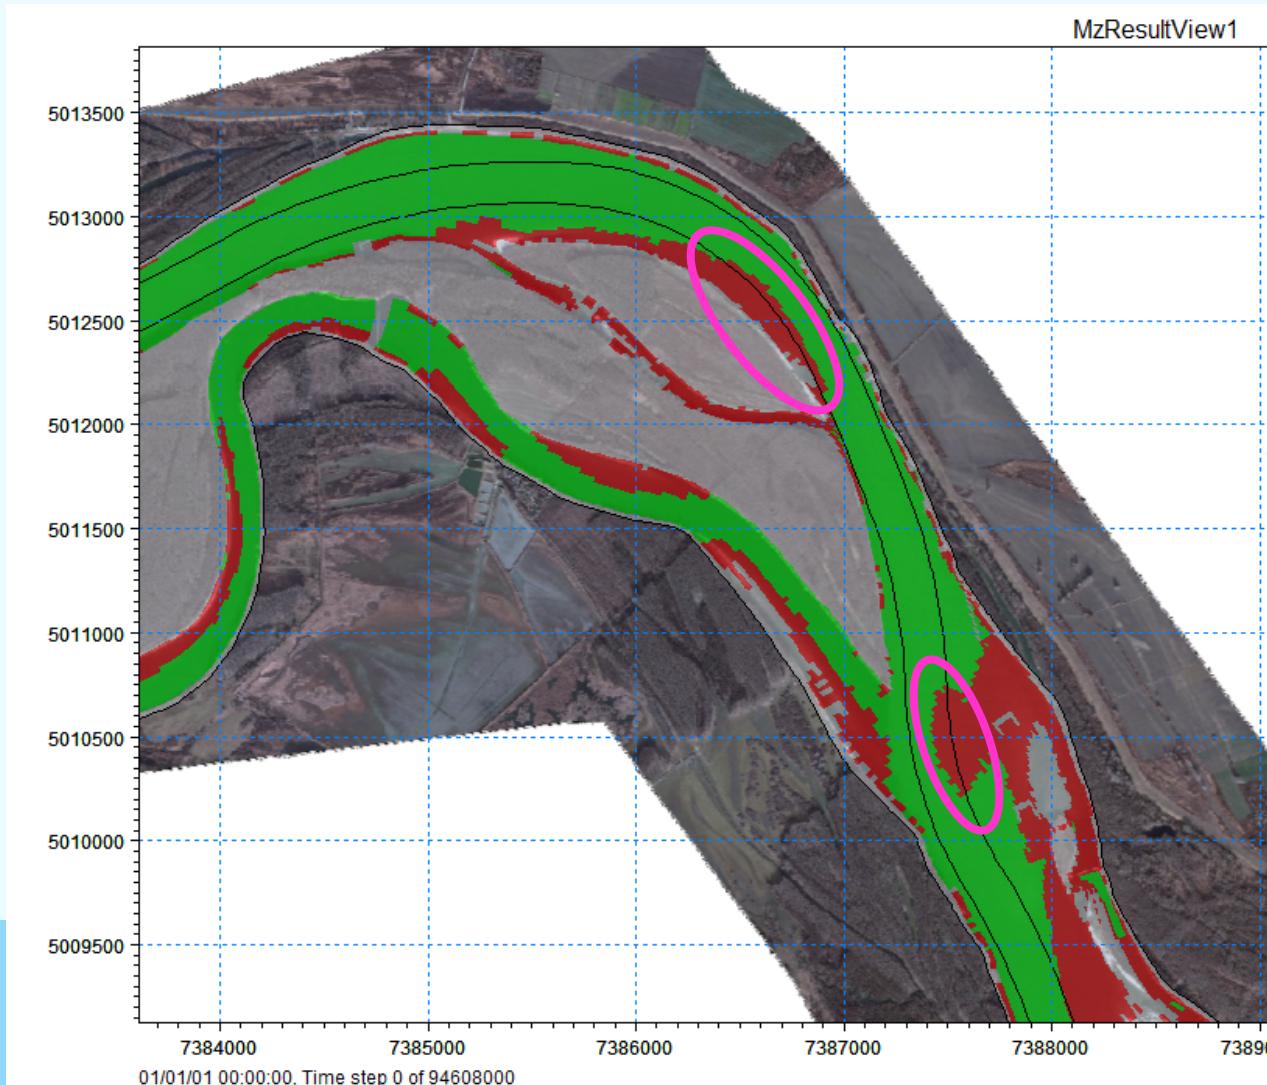

# 18. Susek – existing situation

Observed bed level changes:

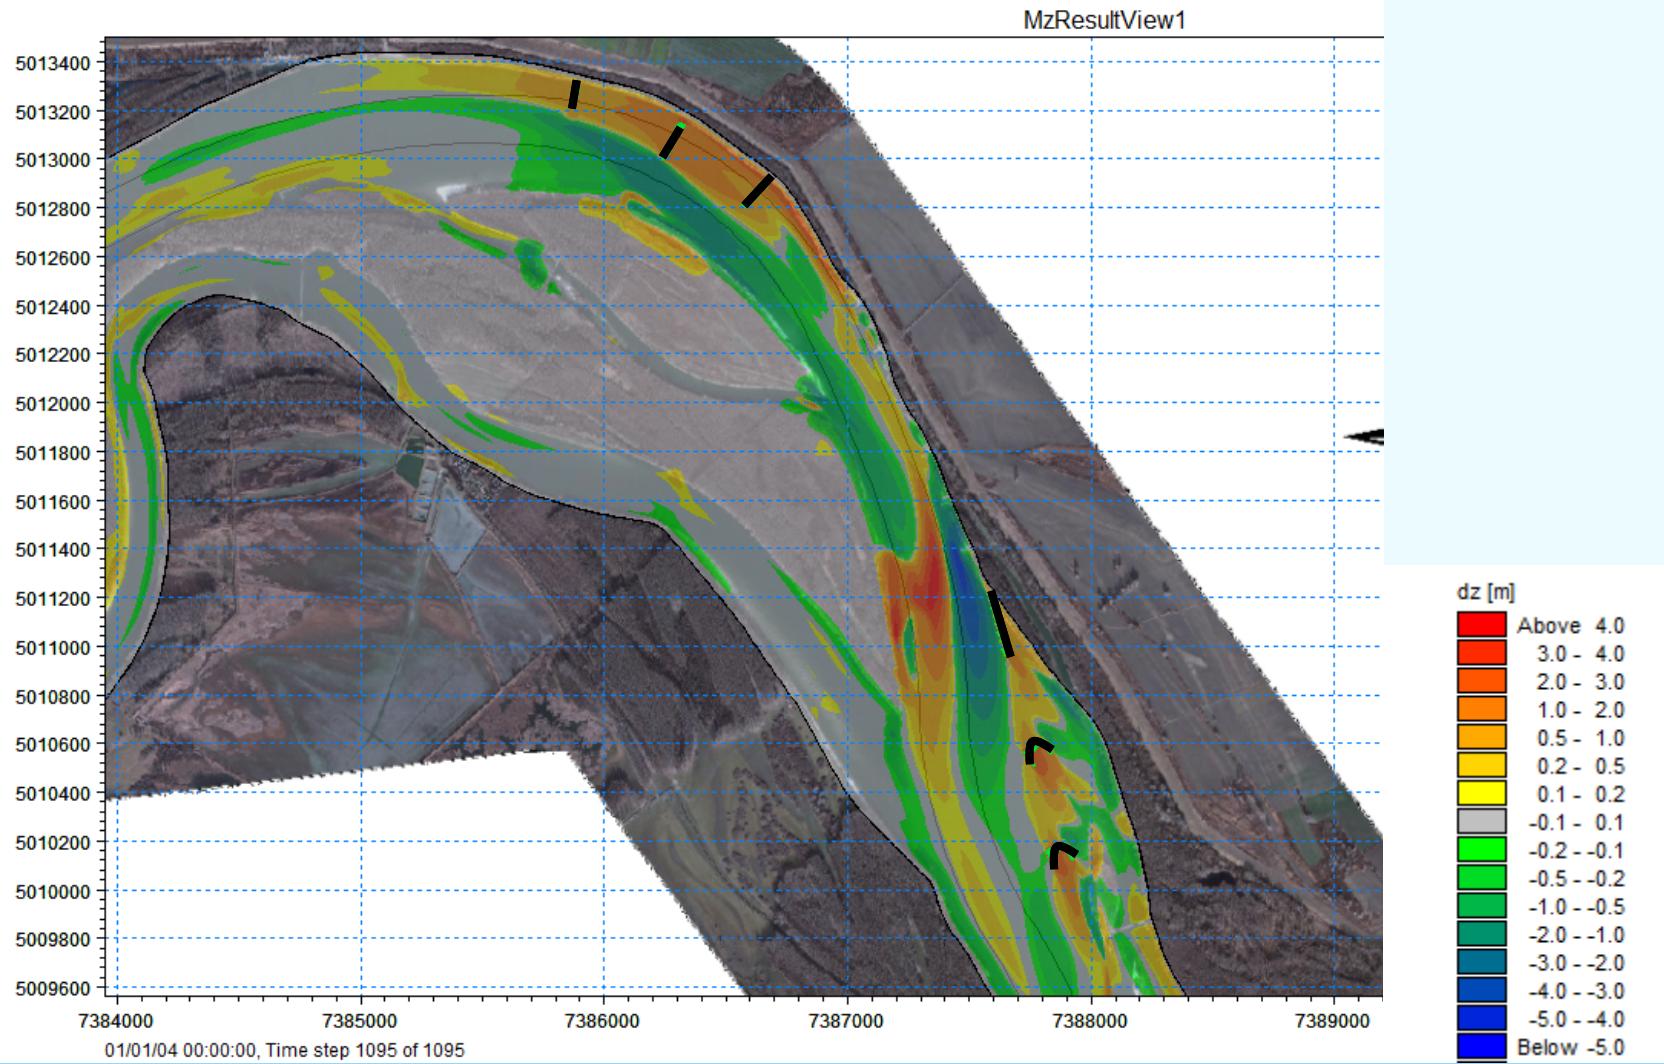

# 18. Susek – existing situation

Where is the depth less than 2.5 m at DLNL (2012)?

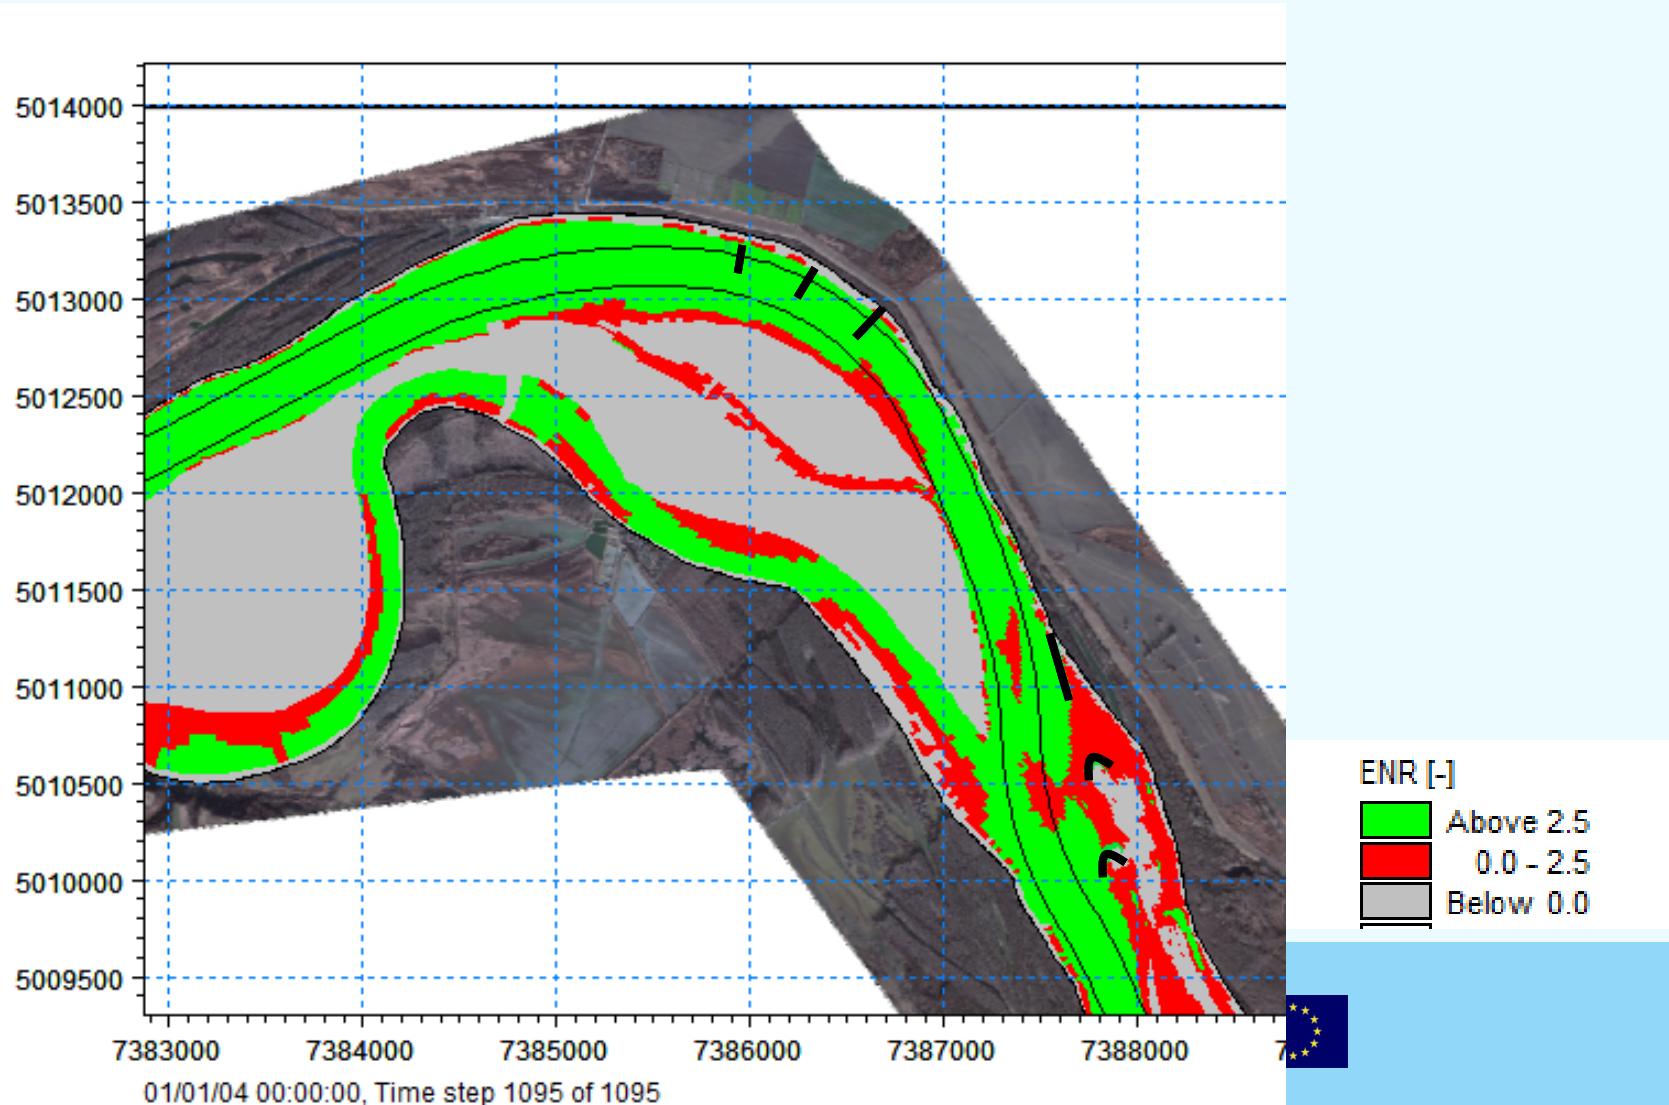

# 18. Susek - simulation

Scenario 1: Simulated bed level changes after 3 years

# 18. Susek - simulations

Do we have sufficient depth below DLNL, green = yes, red = no

# 18. Susek – next steps

Optimisation of:

- Sills location and height
- Location and height of longitudinal dike
- Chevrons location and height (DLNL+0.5m and +1m)

Mitigate adverse morphological effects (in other words make sure we don't get problems downstream)
